About the Talk: Introduction of Nanatom Technologies. Product portfolio of Material characterization products. Multirole multiscale material characterization, In-temperature characterization, In-situ test platforms - SEM, XRD, Optical will be presented in detail. Strengths, USPs and value additions, Q&A and possible engagement opportunities with IPR also will be discussed.

About the Speaker: Mr. Mandeep Singh. Mandeep is the founder and CEO of Nanatom Technologies since 2015 which is a force to be reckoned with in material testing technologies. He is an engineering graduate with more than 20 years of experience in building material characterization instruments. In addition to his passion to build world-class instruments, he is leading Nanatom Technologies in areas of Sensor design, Instrumentation, Electronics, and Embedded systems development.
