**Title :** In-house Real Time CCTV Monitoring and Intrusion Detection Software Based on Deep Learning Techniques

**Speaker :** Mr. Agraj Abhishek

Institute for Plasma Research, Gandhinagar

**Date :** 16th November 2017 (Thursday)

**Time :** 03.30 PM

**Venue :** Seminar Hall, IPR

**Abstract :**

A software for automatic intrusion detection from live CCTV footages of multiple CCTVs, has been developed and deployed on trial basis, at IPR. The software has been developed using free opensource deep learning tools.

The detailed methodology of analysis of CCTV footages and detection of objects of interest, deployment details and salient features of the software, will be discussed in the talk.
